In modern fast-paced world the topic of the importance of education has always aroused heated debates. Many opine that educating people is just passing down knowledge that assists in floating your boat, whereas others consider it as an opportunity to excel, to break limitation of the given ~~status~~ circumstances. In this essay we will look into this matter.

It is a known fact that education is a complicated topic because of the combination of many factors, as personal traits of teachers and students, competence, conditions of studying and teaching, but one

of the most difficult achievement is to inspire students, to pass down the "fire", not only working knowledge. Therefore, in schools and universities we have ~~many~~ various types of studies, so everyone would find something to dive into. Also, there are possibilities to change your life ~~also~~ globally, as we are living in the era, when information, teachings and experts are accessible from any point of the world. If I were to reconsider my competence or to get another diploma to change the way of viewing life, I would not even spend a second of thinking cause it is a big time to light a fire in your eyes, and soul.

Providing decent education, as it was mentioned above, is ^{an} "enormous task, ~~but~~ nevertheless, If students do not have grim determination and patience to be consistent in their studies, academic achievements are more prone not to be gained. Education, is ~~not~~ only about knowledge, books, teachers, but about the attitude towards yourself, to foster oneself, to surpass the limits, to become ^a better individual. It is a choice of seizing every opportunity and learning the unknown which ~~lead to~~ leads to fulfillment, social recognition and self-sufficiency. Some

people can argue the fact that even being determined and motivated in getting education ~~co~~ does not mean that success is certain. It is rather a possibility and ~~output~~ ^{efforts} that you have put into ^{your} own growth, education is a ladder we climb to get what we desire. Thus, come down on one side of the fence or the other. In all times, it is the best scenario of risking and trying in the pursuit of knowledge, "fire" and fulfillment.

To sum up, all things depend on person's choice and nothing is certain. As it was mentioned above, our outlooks and attitudes can benefit ~~and~~ us in fostering ourselves, but we as society should not overlook education only as filling a bucket. That is high time to reconsider our thoughts and ^{to} find new angles to look from to the brighter future.

$$k_1 - 45 + 2 = 47$$

$$k_2 - 25$$

$$k_3 - 13 + 10 = 14$$

$$k_4 - 7 + 2 = 9$$

$$905 + 5 = 955$$
